

FLAGMARKA - Low Line Warning Flags

Provides a visual warning of power lines and wires for plant & equipment

Key Features:

- **High Visibility:** Bright orange flag with reflectors flaps with a breeze to increase line visibility.
- **Durable Construction:** Made from materials resistant to UV rays, extreme temperatures, and harsh weather conditions.
- **Cost-Effective:** Low maintenance costs due to its robust design and materials.
- **Protection:** Ideal around construction sites and mining applications by demarcating utility power lines.
- **Lightweight Design**
- **Easy to install**

The FLAGMARKA is a highly visible device designed to enhance the visibility of overhead power lines, especially in low-visibility conditions, thereby reducing the risk of wire strikes by low flying aircraft, machinery as well as plant and equipment.

The bright orange colour of the flag and reflector combination provides excellent visibility. This in combination with movement from the flag with a breeze helps to grab operators attention.

Dimensions	300mm(W) x 400mm(D)	11.8 in x 15.8 in
Weight	380g	13.4 oz
Clamp Open/Close range	50mm to 2mm	2 in to 5/64 in
Clamp material	Nylon 6	
Soft jaw	TPE	
Flag	PVC	
W = the width of the Orange Flag D = Drop from conductor when installed as depicted
