

Possum Tails - Insulating Conductor Cover

Safeguarding Powerlines with Advanced Wildlife and Fire Protection

Key Features:

- **Wildlife Protection:** Prevents flora & fauna from contacting live wires – preventing outages, protecting wildlife and the environment.
- **Durable:** Engineered with UV-resistant materials ensuring long-term performance.
- **Highly Flame Retardant:** V0 flame resistant -Non-combustible which helps prevent flame spread or habitat ignition.
- **Lightweight:** Designed for minimal weight
- **Up to 26kV phase to ground:** Up to 38kV phase to phase Line Voltage.
- **Simple Installation by hand or with tool**

Possum Tails helps mitigate the risk of foliage and wildlife contacting powerlines, reducing the likelihood of fires, power outages and incidents.

Possum Tails is a cost-effective measure compared to the potential consequences, of the loss of wildlife habitat, the risk to human life, and significant damage caused to electrical infrastructure.

Possum Tails is a durable, lightweight solution that not only addresses the issue of wildlife electrocution but also enhances fire safety and operational efficiency. Plus, it is easy to install using a specialised slider tool.

With features such as UV stability and flame retardancy, **Possum Tails** ensures long-lasting protection under harsh environmental conditions, making it a practical and effective choice for comprehensive powerline safety management.

Use Range	19 – 28mm	0.75"-1.125"
Supplied Length	15M	49.2 ft
Weight	~630g/m	~2oz/ft
Colour	Grey	
AC Dry Withstand/1 min	Passed at 26kV (Phase to Ground)	
Item Code: PT20A1	Possum Tails 15m Length Grey Silicon Rubber Covers
