

Product Data Sheet - Glove (Roller) Air Test Tools

Glove Air Test Tools are to make rubber insulating glove inspections easier and more comprehensive

Key Features:

- PVC conduit with slot
- Designed for both LV (Class 00 and Class 0) and HV (Class 1-4)
- The glove air test tool allows operator to entrap air inside the glove with greater control and ease. This in turn makes it easier for the operator to perform the glove air test, and get more comprehensive results
