“WHO WE ARE”

Since 1974, Balmoral Engineering has been manufacturing and supplying a range of safety products for the Electricity Industry with a core focus on the prevention of Power Line Strikes.

We are a multi-generation family business with a long term view and partnership approach to working with our Utility customers.

We have forged close relationships not only with our customers, but also our Japanese suppliers who are also a multi-generation family company. For decades these partnerships have developed with a foundation of trust creating bilateral respect and dependable outcomes. This is reflected in the tenure of many of these relationships, some dating back to the companies inception.

WARNING MARKERS

- Marine grade components

- Reduced line loading by design

- Thermally tested

- UV Resistant

- Soft jaw protects cable and prevents creeping. Fits all lines from 2-50mm diameter

Compliant with AS 3891.2 2018

- Dielectric strength tested

- Snow and ice tested

- Ozone tested

- Wind tunnel tested

- Aerodynamic 3D design, rotates for high impact visibility from all angles of approach

WARNING MARKERS

Recommended Products

POLEMARKA

Power pole strikes from construction and agricultural plant and equipment are an all too common occurrence, potentially causing serious injury or death.

These incidents can result in major asset damage and power outages.

Our POLEMARKA has been specifically designed to mitigate against these risks faced by electrical distribution companies, as well as contractors and industry workers worldwide.

- Designed with science
- Premium reflectors across surface
- High internal contrast provides better visibility in a range of environmental conditions
- Highly tested, designed for durability
- Simple yet effective concept, high impact visibility
- Wrap around design enhanced visibility from all angles of approach

BIRDBLOCKA

BIRDBLOCKA

- Designed to be installed on Power Lines anywhere along the span or near the cross arm to prevent birds from landing or settling on the lines.
 - Suits most cable sizes.
 - Will keep vertical orientation and face upwards.
 - UV stabilised with good electrical insulation properties.
-
- Where this is done, use rubber stoppers for every 10 Bird Blockers installed.

LINE GUARDS

- Unique striped safety feature

- Stamped & rated to comply with Australian and International Standards

- Robust design and construction backed by decades of engineering to ensure the highest quality & safety standards

- Eyelet in bell housing allows locking by cable ties & complies with WHS requirements

- Weather resistant

- LV & HV options available

- Rigid guards or flexible style hose cater for most requirements

- Suitable for use on Power Lines & Wires as visual warning, mechanical protection and electrical insulation

Outer Protector Gloves should always be worn over Rubber Insulating Gloves to prevent mechanical damage to the rubber gloves. The Outer Protector must be properly sized and shaped to avoid the deformation or damage of the Rubber Insulating Glove. The minimum distance between the cuff of the Rubber Insulating Glove and the cuff of the Outer Protector Glove is listed in the table below "Clearance for Outer Protectors".
